## Tonkin Replicas Press Release

### Introducing the Cat® 621K & 627K Scraper Models

In 1/50 scale, these models will please collectors with their high level of detail. The fully operational bowl is one of the key features as well as the highly detailed hitch section. In addition, wheel tractor scraper enthusiasts will also see Tonkin Replicas' standard metal railings, a 90-degree turning radius and rubber tires on the scale models.

The 621K model is equipped with a front end bumper and shows all the interior details of the real machine.

The 627K model is equipped with 2 engines, planetary wheels and the push-and-pull arrangement that will give collectors the opportunity to combine two scale models and reproduce what they actually see in the field.

In real life, the 621K and 627K are known to offer quick loading, high travel speeds and the ability to load and dump on the run thereby yielding fast cycle times and allowing Cat Wheel Tractor Scrapers to consistently deliver high productivity at the lowest cost per ton.

These Tonkin Replicas' models will be available in October at your favorite hobby shop.

### Information About The Company

Tonkin Replicas is based in Seattle, WA. Since 1970, Tonkin Replicas has built diecast model trucks for all major North American truck OEM's. They sell their customized models to trucking companies, OEM dealers, industry suppliers, and they count some of the worlds' largest transportation companies as their customers. Tonkin Replicas has been a Cat licensee since 2012. Tonkin Replicas opened a new site in Europe on July 1st that is responsible for the sale and distribution of the Tonkin range in the EAME territory.
